

## Selecting a Soul Language Practitioner

Just like your Soul, Soul Language Practitioners are unique in their sacred missions and purposes. The utilization of Soul Language into your daily sacred practice helps one go deeper into their connection, to feel more supported by others and the Divine. This questionnaire helps provide you with several things:

- To help you tap into your “gut” to select a guide on your spiritual journey
- To help you “make” that decision based on love for yourself and not out of fear
- To help you determine which Soul Language Practitioner is best in alignment with your needs, desires and goals

The main suggestion we have is to answer these questions with full honesty, and remember that Soul Language is not the “secret key” that will solve all of your conflicts, either internally or externally. It is an amazing practice for deep connection, for support and for guidance. All the rest is YOU and the Divine.
